

Digital Kitchen Plans & Design Service

ONLINE KITCHEN DESIGN SERVICE - £120.00 INC VAT

We like to make buying a kitchen from the German Kitchen Store a stress-free and simple process, so if you need some help with creating the design for your kitchen, for just £120.00 incl VAT, we can create fully rendered true-to-life images in the door range of your choice, so you can see exactly how your kitchen will look.

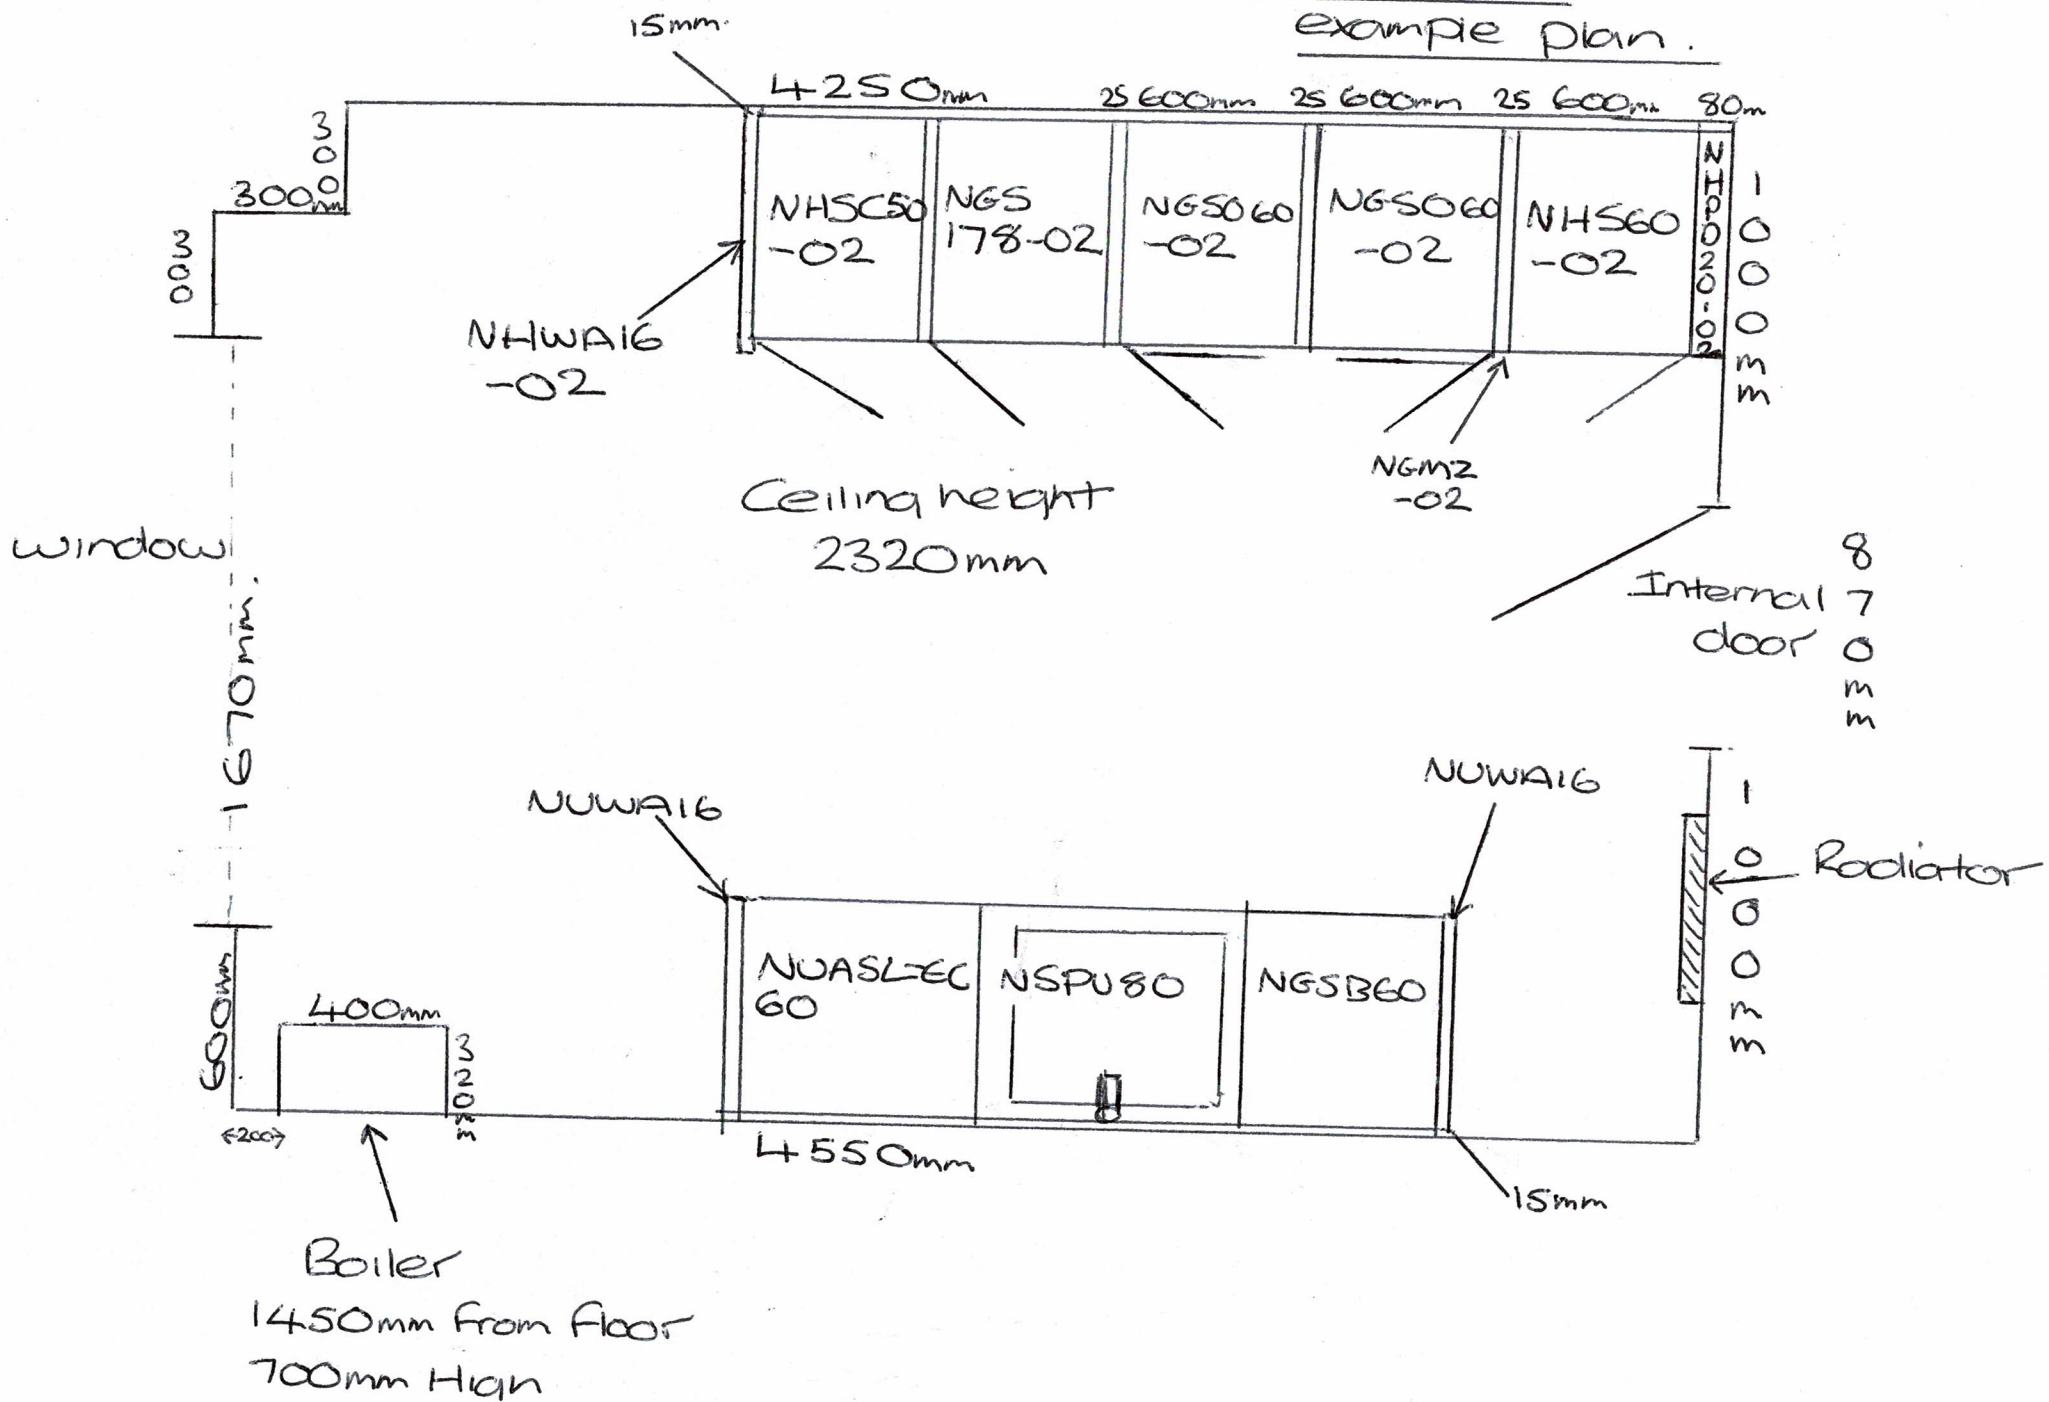

If you opt to take out our online kitchen design service, we will send you an information pack that will provide help and guidance on how to measure the room so you can provide us with what we need to get the design underway.

We will send through the initial design within 72 hours and you can make as many changes as you wish. We have a customer support line on **01525 851 642** or you can email **hello@germankitchenstore.co.uk** with any questions you may have.

In taking out our online kitchen design service, and as long as your measurements are correct, we will take full responsibility for all of the units and components on the order.
